### Skills

React.JS | React Native | Angular.JS | JavaScript | jQuery | Node.JS | Express |  
Mongoose | MongoDB | Socket.io | HTML5 | CSS3 | Python | Django | Responsive Design  
| OOP | GitHub | Git | MVC | C++ | C | RESTful APIs | Bootstrap | AJAX | OAuth | JSON |  
Full-Stack applications | Full CRUD functionalities | MERN Stack | Postman | Material-UI |  
PostgreSQL | Google Firebase | Token Based Authentication | Passport | Relational  
Databases | Expo | Microsoft Office | Multi-Tasking | Project Management | Frontend  
Design

---

---

### Projects

#### Zart Message

- ❖ Used HTML5/CSS3 to create the views of my messaging app
- ❖ Implemented authentication with sign up / log in / log out functions using Token Based Authentication
- ❖ Built the app with full CRUD functionality using Ajax, JavaScript, Socket.io and Mongoose on Node.js, React and Express frameworks
- ❖ Data is stored, retrieved, and updated using MongoDB Atlas online

#### You Pick

- ❖ Used HTML5/CSS3 to create the views of my social media app
- ❖ Implemented authentication with sign up / log in / log out functions using Passport.js, OAuth
- ❖ Built the app with full CRUD functionality using JavaScript on Node.js and Express frameworks
- ❖ Data is stored, retrieved, and updated using MongoDB Atlas online

#### Collection Junkie

- ❖ Worked with teammates together to architect, design, and collaboratively build a full-stack application that uses the Python-based Django Web Framework
- ❖ App connects to a PostgreSQL database to store user information and trip plans
- ❖ Authenticate users using Django's built-in authentication to allow users to store record collection

#### Minesweeper Game

- ❖ Used JavaScript DOM to render game view
- ❖ Applied recursion and JavaScript to create game logic
- ❖ Used HTML5 and CSS3 to create the visual of the game page
- ❖ Implemented Git throughout the process for version control and to test new features on a new branch
- ❖ before implementing them into the master branch

---

## Experience

---

### Freelance Software Engineer

Los Angeles, CA | 2018 –Present

- ❖ Created website layout
- ❖ Communicate with back-end by Fetching json object
- ❖ Integrated data from various back-end services and databases
- ❖ Gathered and refined specifications and requirements based on technical needs
- ❖ Cooperated with graphic designers to match visual design intent
- ❖ Created visually appealing sites that featured user-friendly design and clear navigation

### Computer Science Tutor

Woodland Hills, CA | 2020 –Present

- ❖ Problem solving
- ❖ Discussing with students about their tutoring needs
- ❖ Finding ways to improve students
- ❖ Academic performance
- ❖ Conducting tutorial sessions
- ❖ And maintaining student attendance records

### Software Support Specialist at Holoo Software Co.

Tehran, Iran | 2015 - 2018

- ❖ Trained users to work with Holoo accounting software
- ❖ Assisted users in installing software
- ❖ Provided customer support including problem triaging and training users via email, phone calls and in person regarding the operation of Holoo accounting software
